TOYOTA RESEARCH INSTITUTE

Dr. Brian Storey is a Vice President at Toyota Research Institute (TRI) with responsibility for Accelerated Materials Design and Discovery, Cambridge-based Robotics, University Research Program, and Optimization teams.

Prior to TRI, Dr. Storey was a professor of mechanical engineering at Olin College. He joined the faculty at Olin in 2000 and was one of the founding faculty members for this undergraduate, engineering-focused college. Dr. Storey received his Ph.D. from the University of California at Berkeley, M.S. from the University of Illinois, and B.S. from the University of Texas at Austin – all in mechanical engineering.
